Data Transfer Utilities [export] [import]

Stage: Sage Export   Client: All   Batch: Create New

[export]

```
"SO"|"M0003133"|"79"|"16062010"|"152100"
"SO"|"M0004723"|"79"|"16062010"|"152100"|"Statement"
```

- Data import/export tools
- Imported data can be validated to check for duplicates with immediate feedback given to user
- Exported data – data objects marked with details of export to prevent duplication and allow for re-run of export in case of issues
- Data exported in comma separated format or output specified by receiving application
